FlocoCoin White Paper

1. Introduction

FlocoCoin (FLOCO) is a next-generation utility token built on the TRON blockchain. Designed to empower the next generation of traders and investors, FlocoCoin aims to revolutionize how users access decentralized finance (DeFi) through a mobile app, making crypto trading accessible, fast, and affordable.

2. Project Overview

FlocoCoin is not just a token — it's a full ecosystem that offers:

- Decentralized trading and lending: Users can trade FLOCO tokens or borrow them through our mobile app with minimal interest and without KYC.
- Mobile-first experience: Available on both Android and iOS, our app will allow users to access, trade, lend, and borrow FLOCO tokens anytime, anywhere.
- Community-driven growth: FlocoCoin encourages active community participation and rewards long-term holders.

3. Blockchain Technology

Built on the high-performance TRON network, FlocoCoin benefits from:

- Fast transaction speeds — Instant confirmation in seconds.
- Low fees — Minimized costs make trading accessible to all.
- Smart contract compatibility — Secure, automated operations for presale, lending, and trading.

4. The Mobile App

Our app is designed with simplicity and security in mind. Key features include:

- Wallet integration: Easy storage and transfer of FLOCO tokens.
- Lending and borrowing: Users can lend FLOCO tokens to others or borrow tokens themselves with a small interest rate, no KYC required.
- Real-time trading: Buy and sell FLOCO tokens seamlessly within the app.

5. Presale Details

The FlocoCoin presale will kick off soon, offering early investors a chance to purchase FLOCO tokens at special rates:

Investment (USD)	Tokens Offered	Price (USD per FLOCO)
20	2,000,000	0.00001
50	5,000,000	0.00001
100	10,000,000	0.00001

Minimum purchase amount: $50 USD or equivalent in TRX.
